	7.9% from 2011 to 2020					
	4.0% from 2017 to 2020					

Despite the growth in the number of member countries, the growth in number of players has been slowing in recent years. It is not clear whether member associations are losing registered players or whether the tie between number of players and WFDF Membership Dues is causing certain Members to underreport in recent years. More analysis is required.

We note that the number of women reported by our Members has remained fairly steady, around 35%, over the last three years.

The following tables provide self-reported data from most of WFDF's member associations. This includes data on: number of athletes and teams across the various disciplines, governance and a financial overview, development, communications, official recognition, media coverage, sponsorships, antidoping activities, and finally more granular data on the various disciplines.
